

# Dairy Herd Health Scheme

Committed to long term partnerships  
supporting British livestock farming

The Dairy Herd Health Scheme is a package of tools to help dairy farmers plan for the health of their herd. The scheme is designed to promote the best ways to keep livestock healthy and focuses on the programmes that will provide the greatest economic return.

## The scheme covers the following:

- Annual health plan covering farm assurance requirements
- Benchmarking (bi-monthly)
- Mobility scoring to support lameness control
- Monthly mastitis monitoring reports
- Parlour visits and teat scoring
- Milk cultures x10 - pathogen profile
- Bulk milk surveillance for infectious disease
- Milking tube usage monitoring
- Out of hours visits at discounted rates
- Veterinary advisory reviews (herd specific)
- Preferential medicine band
- 25% off FarmSkills training courses
- Discussion group membership and training points (DairyPro)
- 20% off all pet bills
- Additional modules available on monthly terms

For particular areas of focus specific  
health modules are available.
