

Farm Vet - York

Are you an experienced, energetic and enthusiastic farm vet that would enjoy living around the delightful city of York? (Sunday Times best place to live)

Based at Bishopton Vets near York, we are looking for a farm animal vet with a passion to integrate with the local farming community. We have a good mix of beef, dairy and sheep clients who we aim to provide with first class proactive veterinary support.

The growing workload is varied from seasonal ambulatory work to cutting edge herd and flock health planning services. The usual kit includes BCF Easiscan, TotalVet, InterHerd +, DietCheck and also many extras including in-house APHA trained pathology service, advanced BRD tools such as Thermal Imaging Camera etc.

The role benefits from being part of a small, close-knit team of vets and support staff in York and a bonded group of engaged, sociable and friendly clients who appreciate our personal approach. There are also the advantages of being part of a large farm practice that has vets with numerous further qualifications (specialists, diploma holders and certificate holders) to learn from and flexibility to pursue further career interests and developments.

Close links with UK veterinary schools offers opportunities in student teaching. Growing international links include exchange partnership with Ontario Veterinary College, University of Guelph, Canada.

Committed to long term partnerships supporting British livestock farming.

Through our sister company, RAFT Solutions Ltd, there is also the opportunity to get involved in on-farm research projects, farmer training and residential and ambulatory advanced breeding (ET, OPU/IVF, BBSE and CASA semen analysis lab) as well as growing consultancy in Sustainable Food Production & Precision Livestock Farming.

We are fortunate to be in a TB4 area, where testing duties are equally shared with seasonal support from TB testers.

With an equally shared 1 in 4 OOH rota, weekly half day, Friday half day following weekend on call and 28 days holiday (plus bank holidays), there are plenty of opportunities to explore the historic city of York, whilst also being on the doorstep of the Yorkshire Dales, Wolds and Moors! Package includes car, mobile phone, allowance for landline/internet and all relevant subscriptions paid, alongside generous CPD provision. Salary would be commensurate with experience.

To discuss this role further call Mark Spilman on 01904 481637 or send a covering letter and CV to:
